PROFILE

Detail-oriented and fast-learning Software Developer with hands-on experience in web development, backend systems, database design, and automation. Skilled in creating scalable applications, building clean architectures, and solving complex problems with practical, efficient solutions. Experienced in Oracle PL/SQL, C#, JavaScript, SQL, Angular, Kafka, and Hazelcast through real projects and internships. Actively developing games, automation tools, and modern web applications. Always improving, always building.

EXPERIENCE

Software Development Intern

i2i Systems — YTÜ Davutpaşa Teknopark
2025

Worked with large-scale telecom products using Oracle Database, Kafka, Hazelcast, and VoltDB. Contributed to data pipelines, backend microservices, and performance optimizations. Gained experience in enterprise-level architecture and team collaboration.
